

9/21/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Angela Lim:

From last week:

- ☒ Discuss project details
- ☒ Work on project presentation

Added mid-week:

- ☐ Organize tasks for next week
- ☐ Meet up with team about UI design

Denysse Cunza:

From last week:

- ☒ Discuss project details
- ☒ Work on project presentation

Added mid-week:

- ☐ Meet up with team about UI design
- ☐ Add React files to Git

Gillian Pantaleon:

From last week:

- ☒ Discuss project details
- ☒ Work on project presentation

Added mid-week:

- ☐ Meet up with team about UI design
- ☐ Add template REST api's to Git

Shariar Kabir:

From last week:

- ☒ Discuss project details
- ☒ Work on project presentation

Added mid-week:

- ☒ Meet up with team to discuss user stories
- ☒ Create Postgres database
- ☐ Set up individual databases

9/28/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Angela Lim:

From last week:

- ☒ Meet up with team about UI design

Added mid-week:

- ☒ Researched packages and tools to be used on client side
- ☒ Created login webpage
- ☐ Work on homepage for when user logs in
- ☐ Connect login and registration endpoints

Denysse Cunza:

From last week:

- ☒ Meet up with team about UI design

Added mid-week:

- ☒ Added default React app to git
- ☐ Work on homepage

Gillian Pantaleon:

From last week:

- ☒ Meet up with team about UI design

Added mid-week:

- ☒ Created register webpage
- ☐ Aggregate prompts for the database

Shariar Kabir:

From last week:

- ☒ Finished setting up the database

Added mid-week:

- ☒ Created tables
- ☐ Continue to work on database
- ☐ Set up login and registration endpoints

10/5/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Angela Lim:

Work Done:

☒ Worked on homepage for when user logs in

Planned Work:

☐ Finish working on homepage for when user logs in

☐ Start connecting prompts to homepage when user logs in

Denysse Cunza:

Work Done:

☒ Created full Mock UI for the homepage

Planned Work:

☐ Create the homepage on the React App

Gillian Pantaleon:

Work Done:

☒ Aggregated prompts for the database

Planned Work:

☐ Finish login and register endpoints

☐ Connect login and registration endpoints

Shariar Kabir:

Work Done:

☒ Created basic CRUD endpoints

Planned Work:

☐ Finish login and register endpoints

10/12/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

- ☒ [x] Worked on homepage for when user logs in
- ☒ [x] Created axios action to get prompts
- ☒ [x] Connected page to prompts in database

Planned Work:

- ☐ [] Add in functionality for the page when a user has made a post

Denysse Cunza:

Work Done:

- ☒ [x] Combining the homepage with React

Planned Work:

- ☐ [] Finish combining the homepage with React
- ☐ [] Start creating form to create a journal entry

Gillian Pantaleon:

Work Done:

- ☒ [x] Learning C# and ASP.NET
- ☒ [x] Importing prompts to the database

Planned Work:

- ☐ [] Connect login and registration endpoints

Shariar Kabir:

Work Done:

- ☒ [x] Finish login and register endpoints
- ☒ [x] Finished CRUD apis for journal entries

Planned Work:

- ☐ [] Adding validation to basic crud endpoints

10/19/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

- ☒ Understanding the API endpoints and how they will be used on the frontend

Planned Work:

- ☐ Add in functionality for the page when a user has made a post

- ☐ Work on style for page when a user has made a post

Denysse Cunza:

Work Done:

- ☒ Finished combining the homepage with React

- ☒ Started creating form to create a journal entry

Planned Work:

- ☐ Finish creating form to create a journal entry

Gillian Pantaleon:

Work Done:

- ☒ Started connecting endpoints for login and register

Planned Work:

- ☐ Finish connecting endpoints

Shariar Kabir:

Work Done:

- ☒ Finished validation

Planned Work:

- ☐ Helping the frontend team

10/26/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

- ☒ [x] Connected journal and mood GET api to frontend

- ☒ [x] Added in conditional rendering functionality

Planned Work:

- ☐ [] Look into ckeditor and how we can edit a post with that

- ☐ [] Work on style for page when a user has made a post

Denysse Cunza:

Work Done:

- ☒ [x] Finished combining the homepage with React

- ☒ [x] Started creating form to create a journal entry

Planned Work:

- ☐ [] Finish creating form to create a journal entry

Gillian Pantaleon:

Work Done:

- ☒ [x] Connecting endpoints for login and register

Planned Work:

- ☐ [] Finish connecting endpoints

Shariar Kabir:

Work Done:

- ☒ [x] Helping the frontend team

Planned Work:

- ☐ [] Helping the frontend team

11/02/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

- ☒ [x] Connected journal and mood PUT api to frontend
- ☒ [x] Added ckeditor to frontend
- ☒ [x] Connected delete request to frontend

Planned Work:

- ☐ [] Work on style for page when a user has made a post

Denysse Cunza:

Work Done:

- ☒ [x] Finish creating form to create a journal entry

Planned Work:

- ☐ [] Work on any remaining styling and functionality for the MVP

Gillian Pantaleon:

Work Done:

- ☒ [x] Finished endpoints for login and register

Planned Work:

- ☐ [] Create logout functionality on the frontend

Shariar Kabir:

Work Done:

- ☒ [x] Helping the frontend team
- ☒ [x] Created GET api to get journal and mood by date

Planned Work:

- ☐ [] Adding in protected routes

11/16/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

☒ Added category to the prompts card

Planned Work:

☐ Work on posting images

Denysse Cunza:

Work Done:

☒ Work on CSS of homepage to make it responsive

Planned Work:

☐ Continue to work on CSS

☐ Look into getting users prompts

Gillian Pantaleon:

Work Done:

☒ Work on CSS of login homepage to make it responsive

Planned Work:

☐ Continue working on CSS

☐ Look into terms and conditions

Shariar Kabir:

Work Done:

☒ Work on image APIs

Planned Work:

☐ Finish image APIs

11/23/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

☒ Finished connecting image CRUD APIs

Planned Work:

☐ Work on styling for images and any remaining styling

☐ Look into integrating images with ckeditor itself

Denysse Cunza:

Work Done:

☒ Working on styling the journal page

Planned Work:

☐ Work on getting previous prompts

Gillian Pantaleon:

Work Done:

☒ Fixed styling for the main page, login and register pages

☒ Terms of service, disclaimer and privacy policy are up

Planned Work:

☐ Work on CSS for login dashboard, including mark/color coded days on the calendar

☐ Get the user to view all previous posts

☐ If possible, create a getting started/ tutorial for a new user

Shariar Kabir:

Work Done:

☒ Finish image CRUD APIs

Planned Work:

☐ Help with any remaining frontend work

Project Goals:

1. Add images
2. Some kind of indication on the calendar to show that user made a post that day
3. Make the app more responsive and look nicer through CSS
4. Get a list of past prompts the user has done
5. Deployment of app

11/30/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

☒ Added in what prompt the user did on the daily journal

☒ Added in page that lists all the prompts the user has done and when

Planned Work:

☐ Work on styling for images and any remaining styling

Denysse Cunza:

Work Done:

☒ Working on styling the journal page

Planned Work:

☐ Continue to style pages

Gillian Pantaleon:

Work Done:

☒ Read react-calendar documentation

Planned Work:

☐ Continue to style pages, including mark/color coded days on the calendar

☐ If possible, create a getting started/ tutorial for a new user

Shariar Kabir:

Work Done:

☒ Edited API to get users prompts

Planned Work:

☐ Help with any remaining frontend work

Project Goals:

1. Add images
2. Some kind of indication on the calendar to show that user made a post that day
3. Make the app more responsive and look nicer through CSS
4. Get a list of past prompts the user has done
5. Deployment of app

Technical Topic Ideas:

1. UI/UX Paradigm
2. Functional Components
3. React Hooks
4. Redis Caching

12/07/20

Zenyu

<https://github.com/angelalim1010/Zenyu>

Backend Repo:

<https://github.com/skabir8/zenyu-backend>

Angela Lim:

Work Done:

☒ Worked on styling for all prompts page

Planned Work:

☐ Work on styling for any remaining styling

☐ Work on final presentation and demo

Denysse Cunza:

Work Done:

☒ Continue working on styling the journal page

Planned Work:

☐ Continue to style pages

Gillian Pantaleon:

Work Done:

☒ Fixed styling of landing page

Planned Work:

☐ Continue to style pages, including mark/color coded days on the calendar

☐ If possible, create a getting started/ tutorial for a new user

Shariar Kabir:

Work Done:

☒ Researched Redis cache for presentation

Planned Work:

☐ Help with any remaining frontend work

☐ Deploy the app

Project Goals:

1. Add images
2. Some kind of indication on the calendar to show that user made a post that day
3. Make the app more responsive and look nicer through CSS
4. Get a list of past prompts the user has done
5. Deployment of app

Final Technical Topic Ideas:

1. UI/UX Paradigm
2. Redis Caching
